NOTES

- a** Data refer to 2017 or the most recent year available.
- b** In calculating the HDI value, expected years of schooling is capped at 18 years.
- c** Based on data from OECD (2017a).
- d** Based on data from the national statistical office.
- e** In calculating the HDI value, GNI per capita is capped at \$75,000.
- f** Updated by HDRO based on data from UNESCO Institute for Statistics (2018).
- g** Value from UNDESA (2011).
- h** Imputed mean years of schooling for Austria.
- i** Estimated using the purchasing power parity (PPP) rate and projected growth rate of Switzerland.
- j** Based on Barro and Lee (2016).
- k** HDRO estimate based on data from World Bank (2018b) and United Nations Statistics Division (2018b).
- l** Updated by HDRO using Barro and Lee (2016) estimates.
- m** Estimated using the PPP rate and projected growth rate of Spain.
- n** Based on cross-country regression.

- o** Updated by HDRO based on data from United Nations Children's Fund (UNICEF) Multiple Indicator Cluster Surveys for 2006–2017.
- p** Based on a cross-country regression and the projected growth rate from UNECLAC (2018).
- q** Updated by HDRO based on data from ICF Macro Demographic and Health Surveys for 2006–2017.
- r** Updated by HDRO based on Syrian Center for Policy Research (2017).
- s** HDRO estimate based on data from World Bank (2018b), United Nations Statistics Division (2018b) and projected growth rates from UNESCWA (2018).

DEFINITIONS

Human Development Index (HDI): A composite index measuring average achievement in three basic dimensions of human development—a long and healthy life, knowledge and a decent standard of living. See *Technical note 1* at http://hdr.undp.org/sites/default/files/hdr2018_technical_notes.pdf for details on how the HDI is calculated.

Life expectancy at birth: Number of years a newborn infant could expect to live if prevailing

patterns of age-specific mortality rates at the time of birth stay the same throughout the infant's life.

Expected years of schooling: Number of years of schooling that a child of school entrance age can expect to receive if prevailing patterns of age-specific enrolment rates persist throughout the child's life.

Mean years of schooling: Average number of years of education received by people ages 25 and older, converted from education attainment levels using official durations of each level.

Gross national income (GNI) per capita: Aggregate income of an economy generated by its production and its ownership of factors of production, less the incomes paid for the use of factors of production owned by the rest of the world, converted to international dollars using PPP rates, divided by midyear population.

GNI per capita rank minus HDI rank: Difference in ranking by GNI per capita and by HDI value. A negative value means that the country is better ranked by GNI than by HDI value.

HDI rank for 2016: Ranking by HDI value for 2016, which was calculated using the same most recently

revised data available in 2018 that were used to calculate HDI values for 2017.

MAIN DATA SOURCES

Columns 1 and 7: HDRO calculations based on data from UNDESA (2017a), UNESCO Institute for Statistics (2018), United Nations Statistics Division (2018b), World Bank (2018b), Barro and Lee (2016) and IMF (2018).

Column 2: UNDESA (2017a).

Column 3: UNESCO Institute for Statistics (2018), ICF Macro Demographic and Health Surveys, UNICEF Multiple Indicator Cluster Surveys and OECD (2017a).

Column 4: UNESCO Institute for Statistics (2018), Barro and Lee (2016), ICF Macro Demographic and Health Surveys, UNICEF Multiple Indicator Cluster Surveys and OECD (2017a).

Column 5: World Bank (2018b), IMF (2018) and United Nations Statistics Division (2018b).

Column 6: Calculated based on data in columns 1 and 5.
