

Stakeholder engagement

Due to the nature of our business and our global presence, we serve and rely on a wide variety of internal and external stakeholders. Engaging with them through a variety of channels across many parts of our organization is critical to how we apply the principle of shared value, and therefore is essential to our business success. Often, we work collaboratively with stakeholders who share our objectives and, in the process, we gain a deep understanding of their work. We listen to our stakeholders’ views and suggestions, and use that feedback to improve our products, services and business practices.

Stakeholder groups

Customers

To create a deep understanding of the healthcare market and its customers, and to provide education and training to expand those markets, we strategically engage with our customers in all regions where we operate. This allows us to develop and deploy products and solutions to meet customers’ needs, today and in the future.

Shareholders

Our focus on shareholders is to communicate that the combination of our business and geographic diversity—our balanced capital allocation and our drive for efficiency—provides a long-term pathway toward sustainable profit growth that returns capital to shareholders (including share repurchases).

BD associates

The attraction, development and retention of talent are critical to executing our strategy and fulfilling our Purpose. We are committed to being an employer of choice by supporting associates’ well-being in all aspects of their personal and work lives.

Business partners

Our suppliers, distributors and other partners in the supply chain help us effectively serve our customers around the world. Our close engagement with these partners allows us to collaborate with them on critical initiatives, allowing us to build an agile and resilient supply chain.

How we conduct meaningful engagement

Engagement is carried out primarily through our Sales and Marketing teams, who are often located close to their customers. This allows them to better understand the needs and culture of our customers and the patients they serve.

Often, senior leaders and/or leaders from functions such as Sustainability, Quality and Procurement will engage with strategic customers on specific topics.

We engage with shareholders in a variety of forms, including annual shareholder meetings, quarterly calls, an annual shareholder outreach program, and other in-person meetings and investor events such as conferences. Engagement is often with our more significant holders; however, we also engage with groups of smaller investors on specific topics.

We engage and develop relationships with associates through a variety of mechanisms. Our Associate Resource Groups provide a forum for associates and their allies to drive change while fostering a deep sense of community within the company and surrounding communities we serve. Where appropriate, engagement is carried out in the local language in order to address language barriers and create inclusion. Voice of Associate surveys, skip-level meetings and town halls are used to solicit associate feedback, and our mentoring and leadership development programs focus on building leadership capabilities.

We engage our partners through a variety of strategic programs. Engagement is primarily carried out by supplier relationship owners, category managers and procurement managers within our procurement function, as well as the Global Supply Chain, Quality, and R&D functions and the central Product Stewardship team.
